SUMMARY

Full Stack Developer with 1 year of professional experience building scalable web applications using React, Next.js, Express, and PostgreSQL. Experienced in REST API development, authentication systems, and responsive UI design. Strong problem-solving skills with a focus on clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3 , Java
Frontend: React, Next.js, Tailwind CSS
Backend: Node.js, Express, Spring Boot
Database: PostgreSQL, MongoDB
Tools: Git, Docker, Postman
Testing: Vitest, Playwright

SOFTWARE DEVELOPMENT EXPERIENCE

Full Stack Developer

ACFSOFT PTE. LTD | 2024 – Present

- Developed and maintained full-stack features using React and Express
- Built REST APIs with JWT authentication and role-based access control
- Designed responsive UI using Tailwind CSS
- Optimized PostgreSQL queries improving API response time
- Fixed production bugs and improved application stability
- Collaborated in Agile sprints and code reviews
- Wrote unit tests using Vitest for React components
- Implemented end-to-end tests using Playwright to validate user flows

FRONT-END WEB DEVELOPMENT INTERNSHIP

July 2023 - Dec 2023

- Assisted in developing front-end components using HTML, CSS, and JavaScript
 - Utilized Bootstrap and Tailwind CSS to create responsive and mobile-friendly designs
 - Worked closely with designers to translate mockups into fully functional web pages
 - Worked closely with senior developers to troubleshoot and fix bugs in the application
 - Gained experience in version control using Git and collaborated with the team through GitHub
 - Participated in daily stand-up meetings and sprint planning sessions
-

PREVIOUS PROFESSIONAL EXPERIENCE

2020 – 2023

Sales and Service Representative

- Hit all daily sales and service targets by talking to customers and helping them find the right products.
- Handled 50+ outbound calls every day, turning potential leads into happy, paying customers.
- Solved customer problems quickly and kept detailed records of all repairs and service issues.
- Managed daily reports on sales performance and call timing to help the team stay organized.

EDUCATION

University of Computer Studies (Kalay) | 2016 - 2017

Complete Web Development Bootcamp (Udemy) | 2023

Front-End Web Development Internship (MMSIT) | 2023

Complete GED Program | 2019

PROJECTS

Personal Portfolio Website

Tech: React, TypeScript, TailwindCSS

Source Code : <https://github.com/David-Sang96/My-Portfolio>

- Built and deployed a personal portfolio website using React and Tailwind CSS.
- Integrated a contact-form and connected it with an email service using Formspree.
- Implemented responsive design principles to ensure compatibility across different devices.
- Implemented Google Analytics to check site traffic and see which projects get the most clicks.

Dnote.io (Note-Taking Application)

Tech: TailwindCSS, TypeScript, React, Express, MongoDB, Cloudinary, JWT

Source Code : <https://github.com/David-Sang96/Dnote>

- Developed a full-stack note-taking web app that allows users to create, search, and manage their personal notes easily.
- Built a clean and organized user interface using React and Tailwind CSS to ensure a smooth reading and writing experience.
- Implemented a search feature to help users quickly find specific notes by their titles or content.
- Added a pagination system at the bottom of the page to keep the layout neat when there are many notes.

TradeHub (Online Marketplace Platform)

Tech: React, TypeScript, TailwindCSS, Express, MongoDB, Cloudinary, JWT

Client-Source Code : <https://github.com/David-Sang96/market-client>

Server-Source Code : <https://github.com/David-Sang96/market-server>

- Developed a full-stack marketplace platform enabling users to register, authenticate, and manage product listings securely using JWT-based authentication.
- Implemented product CRUD functionality, image uploads via Cloudinary, category filtering, search, and pagination for efficient data handling.
- Built a comment and notification system to support user interaction between buyers and sellers.
- Designed RESTful APIs and structured the backend using Express and MongoDB with modular architecture for scalability and maintainability.
- Deployed the application with environment-based configuration and cloud database integration.

iCore – Full-Stack E-Commerce Web Application

Tech: Next.js, TypeScript, Drizzle ORM, PostgreSQL, Tailwind CSS, Stripe

Source Code : <https://github.com/David-Sang96/iCore>

- Developed a full-stack e-commerce platform using Next.js with server-side rendering and modern App Router architecture.
- Designed and managed a PostgreSQL database using Drizzle ORM for type-safe queries and scalable schema design.
- Implemented product listing, category filtering, product detail pages, and dynamic cart functionality.
- Integrated Stripe payment system to support secure checkout and order processing.
- Built user account features including order history, profile management, and avatar upload.
- Structured backend logic using server actions and API routes to handle authentication, orders, and transactions securely.
